DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

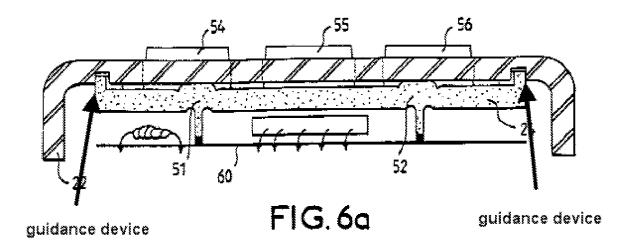

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 14, 16-18 and 28 are rejected under 35 U.S.C. 102(e) as being anticipated by Moree [US 6,921,988].

In regard to claim 14, Moree teaches in [Fig. 6a] an anti-intrusion device for detecting possible attempts to open a housing, comprising at least one spring [51-53], the spring being arranged in such a way as to be under pressure and act electrically on an electronic circuit [60] when the housing is closed, and to no longer act on the electronic circuit when the housing is open.

In regard to claim 16, Moree teaches in [Fig. 6a] that the spring is placed in a guidance device [please refer to the attached figure] arranged so as to guide the spring along the longitudinal axis of said spring.

In regard to claim 17, Moree teaches in [Fig. 6a] that the guidance device exhibits a substantially cylindrical recess, in which recess the spring is intended to be placed.

In regard to claim 18, Moree teaches in [Fig. 6a and col. 4, lines 42+] that the action of the spring on the electronic circuit is effected through an electrical contact between a conducting part of the spring and conducting tracks of the circuit.

In regard to claim 28, Moree teaches in [Fig. 6a and col. 4, lines 42+] that an end of the spring is in contact with the electronic circuit, and is electrically linked to at least two of the various conducting tracks.

Allowable Subject Matter

Claim 32 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The references do not teach that a conducting zone is disposed around the conducting tracks, the conducting zone being linked to a determined potential.

Response to Arguments

Applicant's arguments filed 10/20/09 have been fully considered but they are not persuasive. In regard to claim 14, Merriam Webster's Collegiate Dictionary, Eleventh Edition defines spring as "an elastic body or device that recovers its original shape when released after being distorted" which is taught by Moree. In regard to claims 16 and 17, Moree does teach a guidance device that exhibits a substantially cylindrical recess as shown in the above included [Fig. 6a]. In regard to claim 18, Moree teaches in [col. 4, lines 42+] that the circuit contains conducting tracks.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection [claim 28] presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2833

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to LHEIREN MAE A. CAROC whose telephone number is (571)272-2730. The examiner can normally be reached on Monday to Friday 8:00 am to 4:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Renee Luebke can be reached on (571) 272-2009. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
